DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Applicant has argued that claims 120, 124 & 126 are enabled by the specification because the specification discloses the use of touch screen and virtual input device in combination. There is some justice in the Applicant's contention that one of ordinary skill in the art could implement this without undue experimentation. After all, Examiner was able to describe how the pointing helmet and the touch screen might work in combination. While the Examiner does not believe this combination was envisioned by the Applicant, that is not the standard. Since one of ordinary skill in the art could have implemented the invention without undue experimentation, the rejection is withdrawn.

Drawings

2. In order to avoid abandonment, the drawing informalities noted in the paper mailed on 3 January 2002, must now be corrected. Correction can only be effected in the manner set forth in the above noted paper.

Allowable Subject Matter

3. Claims 119-127 are allowed.

4. The following is an examiner's statement of reasons for allowance: A thorough search of the prior art fails to disclose any reference or references, which, taken alone or in combination, teach or suggest, in combination with the other limitations, providing feedback based on a characteristic of the virtual object.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
